## SUMMARY

I am ready to use my skills in a dynamic and collaborative team environment. With my commitment to continuous development and meticulous work, I am ready to contribute effectively to projects and deliver high-quality software solutions.

## WORK EXPERIENCE

**Software Engineer Intern**, SNI, Istanbul, Turkey(On site)

**June 2023 – Aug 2023**

During my internship at SNI Technology, I had the opportunity to learn a multitude of new technologies through the provided road map and my consistent and diligent work. Throughout this experience, I gained proficiency in various technologies, including the fundamentals of **Java, SQL, Spring framework** Rest API architecture, **Hibernate-JPA, Flyway, and Docker**.

**Business and Product Analyst Assistant**, TalentMondo, Talinn, Estonia(Remote)

**March 2021 – Sep 2021**

Facilitate communication between different teams, ensuring everyone is aligned on product vision and goals. This includes organizing meetings and writing reports. Analyze product performance data, user interaction metrics, and other relevant information to evaluate the success of product features and identify areas for improvement. Familiarity with data entry software and tools, as well as electronic spreadsheet applications like **Microsoft Excel and Power BI**.

## TECHNICAL SKILLS

**Programming Languages:** Java (Used it in live projects), JavaScript (Used it in live projects), SQL (Used it in live projects), TypeScript

**Frameworks and Databases:** Spring Boot (Used it in live projects), React, Angular (Used it in live projects), MySQL, PostgreSQL (Used it in live projects), MSSQL, MongoDB

## EDUCATION&CERTIFICATES&BOOTCAMPS

**Beykent University , Istanbul**

**Sep. 2019-Sep. 2023**

**Management Information Systems**

**Certificates:**

Data Scientist with Python(**DataCamp**)

**2020-2021**

Turkcell Geleceği Yazarlar Java 101 Sertifikası(**Turkcell**)

**2021**

Advanced SQL(**Patika**)

**2021**

+10 hours of conversation English with native speaking tutors on Cambly(**Cambly**)

**2021**

Başlangıç Seviye Java ile Backend Web Development Patikası(**Patika**)

**2022**

**Bootcamp:**

**ebebek** Java & QA & SAP Spartacus Practicum

**28/10/2022-25/11/2022**

## PROJECTS

**WeatherApp**

**2024**

This project is a weather application developed using Spring Boot. The application provides weather forecasts using a **RESTful** web service. It allows users to query weather forecasts for a city, providing predictions at 3-hour intervals covering a 5-day period. The application retrieves weather forecasts using the **OpenWeatherMap API**.

**Spring Boot, Spring Cloud Feign, Spring Security, Spring Kafka, JWT, PostgreSQL, Mockito**

**E commerce Clone**

**2024**

- The user manages a service that handles products and reviews.
- An email and a phone number belong to only one user.
- The same username, phone number, or email cannot be registered.
- The user type can be an individual or a company.
- **Maven, Spring Boot, MapStruct, Swagger, PostgreSQL**

**Broker**

**2023**

CRUD operations, event listeners to exchange messages between services. If a product is not in the inventory, the receipt service doesn't work. **Keycloak** and **JWT** for security. **Flyway** for database migrations. In this project, I aimed to adhere to **SOLID** principles and utilized a layered architectural structure with separate packaging for each functionality

**Payment App**

**2023**

CRUD operations in **ASP.NET** Web Api with **Angular 16** using entity framework core and **SQL server**
